Electronic Coin Counters

The **IBEX** models are electronic machines for counting and classifying coins with bag stop program and high-speed operation, fully adaptable to any new coinage issue appearing, equipped with system sort key of currencies with lateral exit for rejected coins. They have millimetre diameter adjustment.

The double knob-adjustment permits easy simple setup.. Once the setting of the knobs is enough to count the proper denomination. Coins which are smaller than by at least 0,5 mm than the current coin adjusted are off-sorted automatically. A memory permits the storage of the counted coins.

Specifications

	IBEX 20	IBEX 30
Dimensions :		
- H	185 mm	360 mm
- W	185 mm	238 mm
- D	360 mm	400 mm
Weight :	8 kg	16 kg
Hopper capacity	1.500 pieces	4.500 pieces
Speed	Up to 2000 c/min Up to 3000 c/min.
Thickness 0,8 to 3,4 mm	
Diameter 14 to 34 mm	
Keypad Hard keypad	
Display 5 segments 2 lines	
Remote Display	no	Included (with interface connection)
Coin acceptance Universal	
Batching 1 - 9999 pieces
